According to www.sportingcharts.com, the largest number of attendees to a Superbowl was 103,985-

"The record for the highest attended Super Bowl game in NFL history is held by Super Bowl XIV between the Pittsburgh Steelers and Los Angeles Rams at the Rose Bowl, which had an attendance number of 103,985. **The Super Bowl has had an attendance of over 100,000 just five times with four of those times coming when the game was held at the Rose Bowl**, the other 100,000+ attendance game came at Cowboys Stadium at Super Bowl XLV between the Green Bay Packers and Pittsburgh Steelers when 103,219 watched the game."

The question is- how would ANY 'sex trafficking victim' at a Superbowl event make ANY MONEY AT ALL, if there were 10,000 of them but only 103,985 people attending the event, many of them wives, some of them children- so there just would not be sufficient potential 'johns' to make it worthwhile for any self-respecting trafficker to bring all his sex trafficking victims to sit in a hotel waiting for a couple of guys to show up.

When the media and politicians publish this nonsense, you'd think they would "Do the Math" before printing such obvious LIES! Even if there were only 500 minors, having sex with 10 "johns" a day, would require far more attendees than can be accommodated by the hosting stadium. Surely 1/4 of the attendees are not hiring minors for sex?
